

Issey Sun Shade Systems Introducing the MaxiZip Series

This MaxiZip is the premium sunshade for conservatories and patios. This system is designed to withstand high wind areas. The main feature of this product is that the fabric is locked into the track by the means of a zip. That means with the MaxiZip flapping of fabric is a thing of the past. The tensioning device is located inside the tracks.

Our Confidence in this series of MaxiZip has been demonstrated with our team standing & jumping on the system

The multi-functional and versatility of the Issey MaxiZip is easily adaptable with any architectural style thanks to its availability in various customisation options, making this Issey Systems one of our most Innovative Protégé thus far.

Issey helps you to create comfort and lifestyle choices by providing your home & business with Sun Shade Systems that extend and protect you and your family from the scorching sun

For 25 years Issey developed stylish and sophisticated system that can be tailored to your design, and customize to your taste. Our European components, combined with local design, manufacture and installation provide the "best of both worlds" in function and form.

This Issey MaxiZip is the premium sunshade for conservatories, pergola and patios.

- The robust MaxiZip is designed to withstand high wind areas, and with the adaptability of the systems, it stretches your mind and the design is limitless.
- The multi-functional of the Issey MaxiZip fits in with any architectural style.
- With the locking zip device incorporated into the track system, flapping of the fabric is a thing of the past.

- The **Issey MaxiZip Pergo** is a freestanding design, where the head box is installed against a support structure; the tracks are the supported columns, either at the end or before the end to create an overhang.
- The front bar can be incorporated with gutters to manage the follow of rain water. This system is perfect for retro-fitting.
- As an option, the integrated **Issey MaxiZip Pergo Vario-Valance** is located at the end of the track and can be incorporated effectively, blocking the low sun.
- Optional LED lighting can be fitted for evening entertainment.
