

Extend your Lifestyle® Aluxor Pivot Arm Cassette

create shade with privacy

The Aluxor Pivot Arm Cassette is a stylish projection window awning that operates using high tension spring loaded arms suitable for high wind areas. The cassette extends and retracts in an arc shape to a maximum inclination of 155°.

The pivot arm awning is ideal for small balconies, side passages and apartment blocks. The awning provides privacy and sun protection whilst allowing for air circulation through a window opening.

The elegant and discreet cassette is constructed from high quality extruded aluminium with the cassette size being 113mm high x 126mm deep. The single unit can be up to 5 metres wide with arm projections of 0.8 metres to 1.5 metres depending on the width and type of fabric. It is available as a wall mount or ceiling mount installation.

The Aluxor Pivot Arm is available in standard colours of white, silver, black and dark grey or in a selection of custom powdercoat colours and a variety of fabrics to complement the awning. The system can be operated manually by a crank handle and gear operation, or can be motorised with optional sun, wind and timer systems.

Aluxor Awnings is a leading manufacturer of German precision-engineered awnings, operating in Australia for over 20 years. Our awnings are built to last.

All operating components are designed and manufactured in Germany and certified to the European CE standard.

Extruded aluminium profiles provide solid, stable and long lasting quality that will not rust or vibrate in harsh conditions.

Construction hardware is made of marine grade 316 stainless steel.

The fully enclosed cassette provides optimal protection for the fabric and operating mechanism when retracted.

Powdercoat profiles pre-treated by chromate conversion prior to coating to ensure longevity of finish.

Aluminium brackets interchangeable for top and wall fix installations.
