

SHADERUNNER

RETRACTABLE SAIL SYSTEM

The outdoor setting is a perfect place for entertainment and relaxation, but without effective shading these areas become uncomfortable through radiant heat, glare and harmful UV rays. Enhance the experience and aesthetic atmosphere of your entertaining areas with a Shadeform Shaderunner.

The Shaderunner gives you the power to manipulate the climate within your entertaining areas. This unique retractable sail shade system allows you to manually control the degree of shade you require at any one time, and neatly folds away to allow maximum sunlight as desired.

Using the best marine grade stainless steel fittings and fixings, the Shaderunner will withstand the test of time. With the ability to fix to existing pergola structures, onto houses and between posts, the Shaderunner is a perfect addition to a wide range of applications.

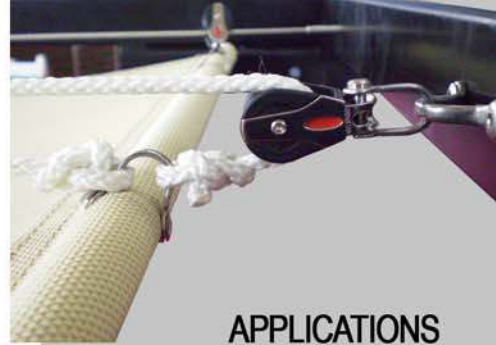

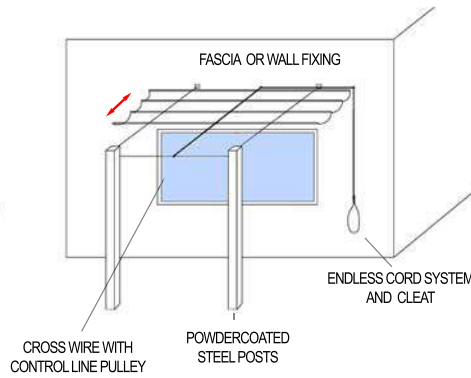

The quality and vast experience of our design and installation team enables Shadeform to tailor a solution for your unique location and provide you with the ultimate in climate control.

DYNAMIC
CLIMATE
CONTROL

OPERATION

The ability to retract the Shaderunner gives you the power to control when and how much shade you require. The sail is retractable using an endless cord system allowing the sail to be cleated at any position. With large extensions possible and a maximum width of 6m the Shaderunner is a perfect addition to countless situations. (conditions apply)

APPLICATIONS

This dynamic sail system is ideal for shading both outdoor and indoor living spaces. The retractable nature of the sail provides ultimate choice between sun and shade.

- Decks
- Courtyards
- Pergolas
- Atriums
- Pools
- Schools
- Commercial Applications

MATERIALS & CONSTRUCTION

The Shaderunner is produced using 90% UV resistant Polyester Mesh fabric, Ronstan marine grade ball bearing pulleys, wiring systems and aluminium tubing.

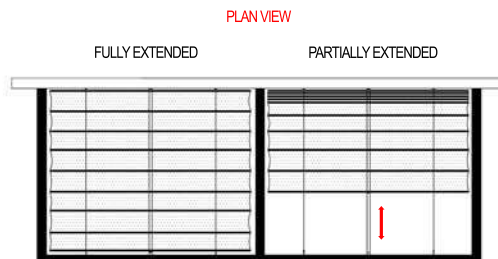

For superior anti-corrosion, smooth operation and durability of the system only marine grade stainless steel wires and fittings are used in construction.

INSTALLATION METHODS

Each shaderunner is custom built and installed to suit the unique application. With our design and installation experience we can recommend the most suitable method for your situation.

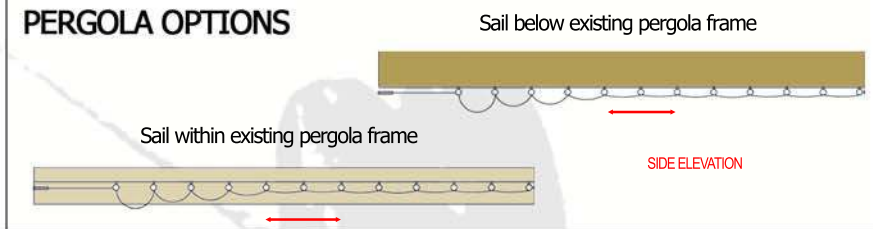

- Fascia / Wall Fixing
- Pergola Fixing (Within / Below)
- Free Standing Post Fixing
- Bulkhead Fixing

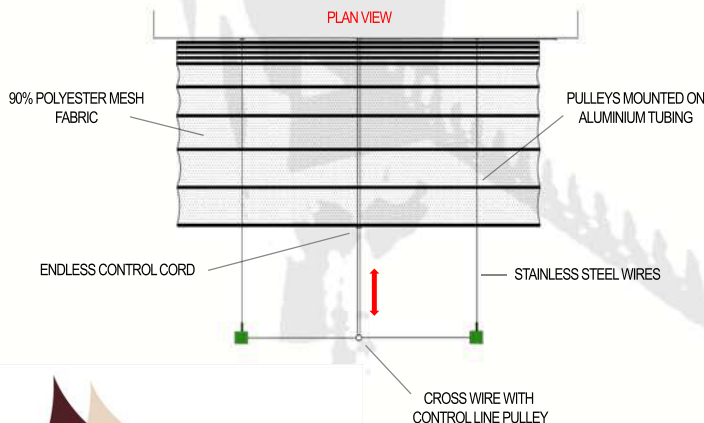

The Shaderunner can be installed into or below existing pergolas and frame structures

PERGOLA OPTIONS

Sail between house fixing and 2 powdercoated posts.

WARRANTY

Shadeform offers a 12 month warranty on all manufacture and installation of products.
90% Polyester Mesh Fabric has a 5 year warranty against UV breakdown and for fabric under tension - approximate 10 year lifespan.
