# conservatory awnings

**The Sundream Conservatory Awning** is especially designed for mounting above glass roofs or pergolas, to stop sun and heat before they reach the interior of your home or business.

The Sundream is a highly versatile and robust awning which runs in sturdy aluminium guide tracks that are designed for durability and maintenance free operation.

The internal roller system has two heavy duty spring units that are increasingly loaded while the awning extends, so that the cover is always being kept under tension, ensuring its smooth operation.

The design allows for a variable **steeraround** function that enables the awning to turn corners of up to 90 degrees.

Awnings can extend to 6.5m in width and 6.5m in projection (up to a total of 39m<sup>2</sup>) with coupled units extending up to 24m wide to a total of 120m<sup>2</sup>. All awnings are motorised and powdercoated to your choice of colour.

## Sundream Conservatory Awning

The **Steeraround** design is ideal for pergolas and for A frame glass conservatories. The design can be customised to suit a wide range of structures.

The Sundream Conservatory Awning can also be supplied with an **Integrated mounting post + rail** (for sizes up to 36m<sup>2</sup>) and light rain **gutter system**.

The integrated frame is supplied with two front posts and headbox mounting plates. Additional back posts are also available.
