

Folding Arm Awnings

Swedish design for
Australian conditions

**Introducing the NEW
Viento FA58 Semi Cassette
Folding Arm Awning**

 **TURNILS®**

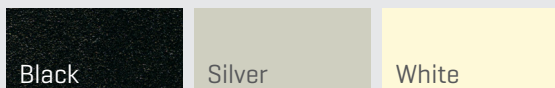

Viento FA58

Folding Arm Awning

CONTEMPORARY DESIGN

- Features a smooth curved hood for a streamlined aesthetic.
- Available in 3 contemporary hardware colours:

EASY INSTALLATION

- The Viento can be easily mounted onto walls or under ceilings.
- Install on the roof with special brackets.

SUPERIOR STRENGTH

- Designed with almost full-cassette look for exceptional resistance to moisture and UV.
- Featuring Dyneema® tape on all elbow and shoulder joints for superior strength and durability making it 15 times stronger than metal chains.

SOLID PERFORMANCE

- Pitch can be set at installation for maximum shading comfort (0° to 20°)
- 5 Year Warranty*

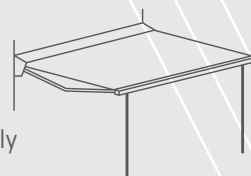

Under European Standard 'EN 13561 External blinds - Performance requirements including safety', the Viento Folding Arm Awning will meet wind ratings of up to Class 2 - wind speed of up to 29-38km/hr [equivalent to 5 on Beaufort scale] - depending on model no. and size. NOTE: These results will only be achieved provided the awning is built and installed with Turnils components according to the Manufacturer's specifications [as stated in the component book] and with a fabric according to the above standard. It is recommended that all awnings be retracted during wet or windy conditions.

CUSTOMISATION

Create a tailored solution by adding Telescopic support.

- This provides next-level stability where very wide awnings will be open for extended periods of time such as restaurants.
- Support beams slide neatly into the front profile.

AUTOMATED COMFORT

- Motorised operation as a standard for the ultimate in outdoor comfort.
- Powered by an efficient merger motor you can control up to 4 awnings on one remote.
- Optional sensors available with preset open and retract functions according to your own personal preferences.
